Message from the Guest Editors

This Special Issue of the *Journal of Clinical Medicine* on “Resuscitation Sciences and Emergencies” is launched by the Italian Resuscitation Council, a non-profit scientific organization with the primary aim to improve and spread resuscitation culture and emergency medical system organization in Italy and Europe. The Special Issue aims to collect brilliant contributions from worldwide experts in the field of Resuscitation and Emergency. Thus, we invite investigators to contribute with original research articles as well as review articles that will stimulate the continuing efforts to understand mechanisms accounting for outcomes of cardiovascular and neurological emergencies; the development of new interventional strategies (surgical and/or medical) to improve survival with good functional recovery; new approaches for evaluation and prediction of outcome; innovation and technology procurement to improve resuscitation and post-resuscitation care; etc.

Important note: the Italian Resuscitation Council will cover the article processing charge (APC) for 10 selected manuscripts; in addition, IRC members can receive a 25% APC discount.
